Total number of unique readers per month of the media outlets that picked up the article:

3,691,166

Altmetric score:

In the top 1.7% of all research outputs (approximately 26 million) scored by Altmetric. (For more details...)

The Altmetric Attention Score for a research output provides an indicator of the amount of attention that it has received. The score is derived from an automated algorithm, and represents a weighted count of the amount of attention we've picked up for a research output.

Number of media outlets that picked up the media release (excluding Chinese outlets):

27

Languages the article has been translated into (not including Chinese):

Spanish, German

Number of media outlets that picked up the media release by country (not including China)

Advertising value equivalency* (USD)

\$6,939.39

*Advertising value equivalency (AVE) is used to measure the dollar value of media coverage. AVE measures the size of the media coverage, the space it was put, and calculates the advertising rate for a similar ad.

Thanks for your support and we look forward to working with you again!
